

# DON'T DIVE FOR THE GAIN CONTROL!

\*PATENT NO. 2-659-777

IMPROVES ANY RECEIVER

## GET A MULTIPHASE MODEL GC-1 GATED COMPRESSION AMPLIFIER\*

Now - it's no longer necessary to "ride" the gain control in SSB-AM-CW round tables in an effort to copy the "barefoot" rigs along with the KW rock crushers! Merely set the Sensitivity control so that the weakest signal in the round table is Q5 and presto - no more blasting.

The GC-1 is a complete audio output system. With its novel Gated Audio AVC circuit, changes in level of approximately 40 db. produce less than 3 db. variation in output. The unit may be connected between the receiver or Sideband Slicer output and the speaker voice coil - it's that simple.

Thousands of GATED COMPRESSION units are in daily use by Deaf Training schools throughout the world to prevent painful "blasting" and to provide relaxed listening pleasure.

Get your MULTIPHASE GC-1 now! Then sit back - relax - enjoy ham radio and pity those who are still diving for the gain control.

Price . . . . . Wired            \$59.50,            Kit            \$49.50
